STERN MASS STEM FAIR BRAINSTORM

At the end of each school year, there is a STEM Fair in which all students participate. You can choose any topic that you like as long as it includes science, technology, engineering, and math.

Right now, all you need to do over Spring Break is to brainstorm ideas about science projects. Use your imagination and/or the internet (such as [Science Buddies](#) or [Education.com](#)) to find ideas and fill out this document.

You don't need to start the project yet! You are only finding ideas. Further instructions on the STEM Fair will come after Spring Break.
